1.0 Purpose:

To ensure participation of patient/ surrogate decision maker in decision making at every level of care.

To explain the benefits, risks and alternatives to the care provided

2.0 Scope:

Hospital Wide

3.0 Procedure:

1. An informed consent shall be obtained through a process defined by the organization and carried out by person performing the procedure according to the legal norms.
2. An informed consent is when the patient has been provided with sufficient information so that he/she understands the nature of his/her condition, the nature and purpose of the proposed treatment, the risks and consequences of the procedure or treatment, the feasible alternative procedure or treatment and the consequences if the procedure is not performed nor any treatment given.
3. The treating physician or his assignee doctor shall discuss in lay terms the procedure, its risks, benefits and alternatives with the patient or the patient's surrogate. The responsible physician or his assignee shall
